INTERNATIONAL TRADE REVIEW

ALBERTA

91-02987/

MESSAGE FROM THE MINISTER

The increasing strength and diversity of Alberta's economy is clearly reflected in impressive results achieved throughout the global marketplace in 1989.

For the third consecutive year, Alberta exports increased, with total exports reaching $14.6 billion. Such continuing growth was all the more noteworthy in light of political and economic restructuring in several major markets, adverse crop conditions in Alberta, and the appreciation of the Canadian dollar against U.S. and other foreign currencies.

While these factors led to a slight decline in the value of the province's commodity exports, service exports more than compensated for this decrease, virtually doubling from $800 million in 1988 to more than $1.5 billion in 1989.

A significant indicator of economic diversification was a marked increase in exports of a number of value-added products. Among other export success stories were electronics equipment including cellular phones, forest products and milled cereals and processed foods.

Alberta's exporters once again demonstrated their considerable skills in the competitive arena of international trade, marketing their products and expertise to 150 countries during the year. To reinforce their efforts and encourage new exporters, a province-wide seminar series was launched under the "Let's Talk Trade" banner. Seminars focused on such key areas as the Asia/Pacific sector, the European Community, and new opportunities created by the Canada/U.S. Free Trade Agreement.

Alberta businesses did not hesitate to seize the opportunities created by the FTA, an important factor in an increase of $500 million in exports to the United States. In the Asia/Pacific sector, exports to Japan increased by 14% solidifying that country's position as Alberta's largest overseas market.

As Alberta exporters continue to earn a reputation for excellence around the globe, so do we salute their achievements here in the province. Our top "export stars" will be honored with Export Achievement Awards – yet all Alberta exporters deserve recognition for their successes. International trade is vital to Alberta, as exports are integral to our sustained economic growth and diversification and make an important contribution to our quality of life.

For these reasons, I encourage Alberta businesses to explore the potential of expanding your marketing horizons and to make full use of the programs and resources we offer. I trust this trade review will provide useful information to you in "going global."

GOING GLOBAL: ALBERTA'S EXPORT STRATEGY

Trade Means the World to Alberta

Alberta is a trading province, and the quality of life Albertans enjoy depends to a great extent on our performance in the global arena. Exports have traditionally made a significant contribution to our annual Gross Domestic Product, and 1989 was no exception. With total trade amounting to $14.6 billion, exports accounted for 20% of Alberta's GDP – an amount which was equivalent to $40 million a day, every day, coming into the province from 150 countries around the world.

ALBERTA GROSS DOMESTIC PRODUCT AT FACTOR COST, BY INDUSTRY ($ millions)

	1989
Agriculture	2,318
Forestry	185
Mining	10,427

Trade	6,526
Finance	12,517
Services	13,158
Public Administration	3,554
GROSS DOMESTIC PRODUCT AT FACTOR COST	**65,000**

Exports are also a critical factor in the stability of Alberta's labour force. It has been estimated that at least 277,000 jobs in the province depend directly or indirectly on international trade. With a total labour force of 1.2 million Albertans, one in every five jobs depends in some way on international trade.

Beyond these direct and quantifiable benefits lies another, less visible but equally important reason why exports are vital to Alberta. International trade is an essential component of economic growth and diversification. Given our relatively small domestic market base, Alberta businesses and industries must have access to larger markets if they are to lower production costs, expand, diversify and achieve their full potential. As they succeed in strengthening existing markets and opening up new markets for their innovative products and services, so the province's economic base is strengthened.

The Global Situation

Technological innovation, intellectual competition and the quality of human resources are assuming even greater importance for Alberta businesses as they compete in the international marketplace. As this global trading environment is becoming more sophisticated and competitive, many countries are forming trade partnerships to give their industries access to larger markets. Indeed, changes sweeping across Alberta's major markets of the United States, the Asia/Pacific Rim, Europe, Latin America, Africa and the Middle East are creating new challenges and opening up new opportunities for Alberta's exporters.

United States – the implementation of the Canada/U.S. Free Trade Agreement (FTA), a process which began on January 1, 1989, will continue to take place over the next eight years as tariff and non-tariff barriers to trade are eliminated or reduced. Negotiations may occur among the United States, Mexico and Canada with regard to the future potential of creating a North America-wide "free trading environment."

Asia/Pacific Rim – while economic and political restructuring led to some stabilization of Alberta export levels, this region will likely remain the province's fastest growing market, over the long term.

Europe – key factors affecting the European trading area include the elimination of internal barriers to trade within the European Community by December, 1992, the re-unification of Germany and the dramatic changes occurring in Eastern Europe. Opportunities exist for Alberta companies to increase sales to this region.

The Alberta Strategy

To address the global trends toward increasing technological sophistication and heightened intellectual competition, and to achieve the objectives of expanding exports while diversifying our markets, the provincial strategy is comprised of four interlocking components.

First is continuing support for the liberalization of trade, to ensure Alberta exporters continue to have access to major markets. As the province's prosperity is tied to the continuing liberalization of world trade, Alberta is an active participant in international efforts to reduce or eliminate barriers, taking a strong stance in ongoing FTA negotiations and in the Multilateral Trade Negotiations of the GATT, working to enhance access to world markets, especially the U.S., European and Asia/Pacific Rim.

Second is an ongoing commitment to export market development. This commitment is translated into positive action through the sponsorship of multi-sectoral trade missions, the development of export promotion and assistance programs, and the operation of international offices to assist Alberta companies.

Third is a priority on enhancing the competitiveness of Alberta business through research and development initiatives, business counselling and information services, and advanced technology programs.

Fourth is providing support for sustained – and sustainable – economic diversification. Beyond providing a positive business climate, an emphasis is placed on environmentally-sound resource upgrading and value-added manufacturing. At the same time, the provincial strategy focuses on new opportunity areas, adding impetus to the evolution of Alberta's advanced technology sector, and accelerating the development of an entrepreneurial culture.

To promote exports from Alberta, Alberta Economic Development & Trade offers major programs designed to assist Alberta businesses. These include:

Export Trade Readiness for Alberta (EXTRA)

Transportation Export Services for Trade (TEST)

Winning Initiatives Through Trade Shows (WITS)

Market Development Assistance Program (MDAP)

Export Loan Guarantee Program

New Exporters to Border States (NEBS)

New Exporters to the United States South (NEXUS)

Export Market Development

Alberta has developed a three-pronged approach to expanding exports. While not neglecting opportunities in other sectors or regions, key initiatives revolve around capitalizing on the opportunities created by the Canada/U.S. Free Trade Agreement, penetrating the European Community, and continuing to develop trade ties with Asia/Pacific Rim countries.

The province has launched a major initiative in the "Let's Talk Trade" program for Alberta businesses. This province-wide, year-round seminar series is designed to provide information and market intelligence to both existing and potential Alberta exporters, and to see them compete more effectively by making full use of the resources available through Alberta Economic Development and Trade.

During the first year of the "Let's Talk Trade" program, more than 800 Alberta companies attended seminars reviewing opportunities in export markets. Another 1,800 companies were introduced to new markets directly as participants in trade missions to a number of regions, including Alberta's three major markets.

United States Market

The Free Trade Agreement provides the basis for broadening our trade relations with our nearest neighbor and largest trading partner. Alberta is continuing to pursue areas where we can further increase and secure our access to U.S. markets.

Europe

The European Community has entered a process to eliminate virtually every internal barrier to trade by 1992. Taken as a whole, this will be the largest economy in the world, with annual trade in excess of $1.5 trillion a year.

Alberta's trade initiatives are designed to assist Alberta companies to compete successfully within Europe today, and to plan strategies for maintaining and expanding their markets in 1992 – and beyond.

Asia/Pacific Rim

With more than one-half of the world's population, this region has six of the most rapidly-growing markets in the world: Japan, South Korea, Hong Kong, Singapore, Taiwan and Thailand.

As a result of a number of special agreements, trade relationships remain strong and hold outstanding long-range potential for a diverse range of Alberta businesses.

Latin America, Caribbean, Middle East and Africa

Alberta companies will continue to pursue opportunities in these areas.

INTERNATIONAL TRADE REVIEW

THE YEAR IN REVIEW

ABOUT THE DATA

This publication is intended to provide a convenient data source for Alberta's international trade in goods. For each country to which Alberta exports at least $1 million in merchandise, the top 15 exports to and top 15 imports from are provided, both for Alberta and Canada.* Regional and sectoral tables and highlights are also included.

Beginning in 1988, Statistics Canada changed its trade commodity nomenclature to that of the international Harmonized System. As a result, comparisons on an itemized basis prior to 1988 are not reliable. As such, the export and import tables for each country contain only 1988 and 1989 data.

Statistics Canada is the primary data source for this publication. Alberta Agriculture publishes export statistics for agricultural commodities using a modified nomenclature. For some products, Alberta Agriculture has adjusted Statistics Canada export figures to more accurately reflect Alberta's contribution to Canada's agricultural production for export. For these products, this publication uses the Alberta Agriculture estimates.

The term "exports" refers to "domestic exports": goods grown, extracted or manufactured in Alberta or Canada, as the case may be, and includes goods of foreign origin which have been materially transformed in Alberta/Canada and then exported. For Canada, "imports" include all goods which have crossed its territorial boundary, whether for immediate consumption or storage in bonded Customs warehouses.

For Alberta, the import statistics are on a province-of-clearance basis, which means that the goods cleared Canada Customs in Alberta either for immediate consumption or for entry into a bonded Customs warehouse. It is important to note that this does not always coincide with the province in which the goods are consumed. Being an inland province, Alberta's import statistics will in many cases be understated as the commodities cleared Customs in another province.

Statistics Canada treats transportation costs in two ways with respect to export data. The export value for a particular commodity will often include a cost component for transportation to the Canadian port of exit. This is usually the case with overseas shipments. Exports to the U.S. are generally valued free on board at place of lading, net of freight charges, discounts and allowances.

Unfortunately, service exports cannot be included on a country-specific basis, as such data is not presently available. Total service exports (including tourism) have, however, been provided in the following "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

* Commodities with export/import values of less than $500 are not shown.

THE YEAR IN REVIEW

Major events helped shape the global trading environment in 1989. These included:

- political unrest in some countries and political restructuring in others;
- natural disasters in a number of countries;
- increasing worldwide concern with the environment;
- the implementation of the Canada-U.S. Free Trade Agreement (FTA); and
- ongoing multilateral trade negotiations to further liberalize trade.

Within this framework, international trade continued to expand in 1989. The General Agreement on Tariffs and Trade (GATT) Secretariat reported the volume of world merchandise trade expanded by 7.5%, resulting in a record trade value of $3.1 trillion (US).

Alberta was a part of this trade environment. The continued growth of the Alberta economy is dependent upon international trade. In 1989, Alberta's commodity exports represented over 20% of the province's Gross Domestic Product. Over a quarter of a million Albertans were employed both directly and indirectly as a result of international trade.

Recognizing the importance of trade, Alberta continued to support the liberalization of trade markets. The implementation of the FTA in 1989 was only a starting point. Bilateral negotiations under the FTA continued throughout 1989 on such issues as accelerated tariff reduction, technical barriers to trade in agriculture, and government subsidies. Alberta also consulted with the federal government and industry regarding the multilateral trade negotiations currently underway. These negotiations involve over 90 countries, including most of Alberta's major trading partners.

Alberta continued to develop both new and established export markets for its goods and services in 1989. The value of Alberta goods and services exports increased by 3.5% over the previous year to $14.6 billion.

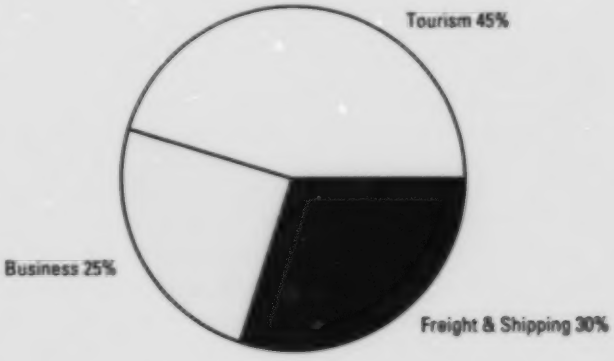
TOTAL GOODS & SERVICES EXPORTS **($ billions)**

Merchandise exports accounted for $13.1 billion, a slight decline of 1.7% from 1988. The decline may be attributed in part to a 4% appreciation of the Canadian dollar against the US dollar, which averaged $0.85 in 1989. Compared to overseas currencies, the Canadian dollar appreciated by 12%.

Alberta expanded its export markets for commodities in 1989, trading with 150 countries or territories. Commodity exports ranged from natural gas to the US and petrochemicals to South Korea, to medical supplies to Portugal and rock cutters to Peru.

Service exports were also an important part of Alberta's total export performance. Alberta service exports increased by 11% over 1988 to a estimated $1.5 billion in 1989. Tourism remained the major service export, accounting for over 45%, or $636 million, of Alberta's service exports. Business service exports, which range from management consulting to computer and engineering services, accounted for almost 25% of the province's service exports in 1989.

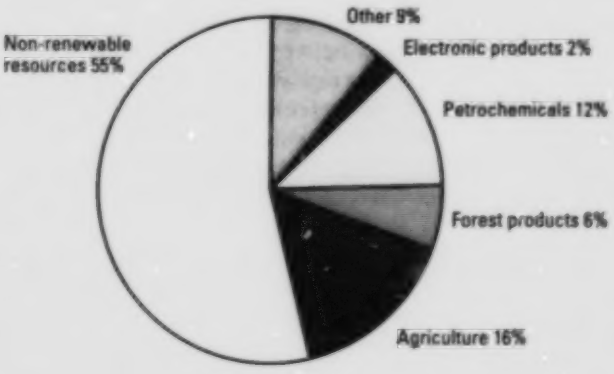
ALBERTA SERVICE SECTOR EXPORTS, 1989



ALBERTA EXPORTS BY COMMODITY

Alberta's commodity exports totalled $13.1 billion in 1989, of which $9.4 billion, or 72% of the value, consisted of the ten largest export commodities. Alberta showed gains in several of its most important export products. The commodities exhibiting export growth came from various sectors of Alberta's economy, as the province continued to diversify its trade profile.

ALBERTA EXPORTS BY SECTOR, 1989



The value of Alberta's crude petroleum exports in 1989 grew by 10% to $3.4 billion from the 1988 level of $3.1 billion as world demand continued to rise. Coal, Alberta's fifth largest export, posted a strong increase of 13% in 1989. This increased export revenues to $486 million for the year.

Provincial exports of forest products increased, a result of recent investment in production facilities in that sector. Alberta's wood pulp exports rose from eighth place in 1988 to sixth place in 1989 reaching $434 million, as a result of a $49 million, or 13%, growth in export revenues.

TOP 10 ALBERTA COMMODITY EXPORTS 1989 ($000s)

	1989	% of Total
1. Crude petroleum	3,426,433	26.2
2. Natural gas	2,765,956	21.2
3. Wheat	572,997	4.4
4. Sulphur	542,174	4.2
5. Coal	486,321	3.7
6. Wood pulp	434,742	3.3
7. Polyethylene	378,009	2.9
8. Barley	291,105	2.2
9. Styrene	276,377	2.1
10. Canola seed	253,774	1.9
TOTAL ABOVE	**9,427,888**	**72.2**
TOTAL ALL EXPORTS	**13,056,105**	**100.0**

Certain agricultural products also enjoyed impressive gains. Barley exports had a banner year in 1989, growing by 103% to over $291 million. Barley rose from being Alberta's 14th largest export to its eighth in 1989. Canola seed exports grew by 10% to total $254 million in 1989.

Export values of ethylene-based petrochemicals in the top 10 declined, although still totalling nearly $1 billion. The decline in value was the result of a drop in worldwide prices. Polyethylene dropped from Alberta's fifth largest export in 1988 to seventh largest in 1989. Styrene exports fell from seventh to ninth place during the same period, despite an increase in export volume.

Non-Renewable Natural Resources

Alberta's exports of major non-renewable natural resources increased slightly from $7.1 billion in 1988 to $7.2 billion in 1989. Alberta derived 55% of its export revenues for 1989 from non-renewable natural resource commodities, a marginal increase of 2% over 1988 resulting mainly from strong sales of crude petroleum, which is Alberta's largest commodity export.

The value of Alberta crude petroleum exports increased by 10% to $3.4 billion while export volumes declined by 10% to 29 million cubic metres. Export sales of Alberta crude oil were almost entirely (99%) to the U.S.

Following a sharp increase of 20% in natural gas exports in 1988, sales stabilized in 1989 with volumes and values showing marginal decreases of less than 1% each. Alberta exports of natural gas amounted to $2.8 billion in 1989. Demand for natural gas has been high in the U.S. for the past two years as a result of unusually cold weather, increased environmental concerns, and progressive marketing by Alberta. In 1989, pipeline capacity constrained export growth and will continue to do so until the capacity is expanded.

Canada is the world's largest producer of sulphur, with Alberta contributing 90% of Canada's total production of elemental sulphur. Alberta sulphur in its elemental form is obtained as a byproduct of sour natural gas processing, oil extraction and refining petroleum. Over 85% of Alberta sulphur is marketed offshore to 29 countries, primarily for manufacturing phosphate fertilizer.

In 1989, a trade dispute between two other countries directly impacted Alberta's sulphur exports. Alberta has traditionally sold large amounts of sulphur to Morocco (over $221 million in 1988), which then produces phosphoric acid. Morocco, in turn, sells the bulk of its phosphoric acid production to India. However, India ceased such purchases for most of 1989. The Indian/Moroccan phosphoric acid dispute contributed to an

83% decline of Alberta sulphur exports to Morocco in 1989 over 1988.

Coal posted the most impressive gains in this sector, showing an increase in its export value of 13% to $486 million with a record export volume of over 8 million tonnes. Japan was the major importer of Alberta coal, accounting for 76% of Alberta's export sales, or $369 million. The closure of several Australian mines left Japan seeking new sources of high grade metallurgical coal. Deliveries of metallurgical and thermal coals to Japan increased by 2% and 8% respectively over 1988.

ALBERTA'S MAJOR EXPORTS OF NON-RENEWABLE NATURAL RESOURCE BASED PRODUCTS **($000s)**

	1988	1989	% Change
Crude petroleum	3,124,359	3,426,433	9.7
Natural gas	2,770,849	2,765,956	-0.2
Sulphur	776,242	542,174	-30.2
Coal	428,965	486,321	13.4
TOTAL	**7,100,415**	**7,220,884**	**1.7**

Agriculture

Alberta's agricultural exports exhibited impressive growth in a variety of commodities. Significant gains were made in the higher value-added goods such as dehydrated alfalfa, processed beef and milled cereals. However, these gains were offset by decreases in a narrow range of primary products, and agriculture exports in 1989 decreased by $350 million to a total of $2,081 million.

Alberta exported a variety of cereal crops with exports of oats, barley, and flax seed increasing 157%, 103% and 86% respectively over 1988. The phenomenal growth of oats exports in 1989 was partially the result of the deregulation of oats marketing in Canada. Saudi Arabia's decision to repeal some of its agricultural subsidies benefitted Alberta's barley exports, seeing that country's barley purchases from Alberta increased to $115 million in 1989 from $43 million in 1988. Flax seed exports also increased as this oilseed brought premium prices in 1989, partly a result of limited global supply.

Canola seed exports remained strong with exports of $254 million, up from $231 million in 1988. Japan imported 87% of Alberta's canola seed exports in 1989.

Alberta continues to move into higher value-added agricultural exports which are processed domestically. To this end, beef exports increased 70% from 1988 to $96 million in 1989, the result of expanded slaughter capacity in Alberta. At the same time, there was a decline in the export of live slaughter and feeder cattle, from 216,481 head in 1988 to 142,133 head in 1989. Pork exports were hindered by the U.S. countervailing duty on Canadian pork which, along with disruptions in the packing industry, resulted in a drop of 28% in Alberta pork exports in 1989 over 1988 figures. At the same time, live hog exports increased 5%, totalling $57 million.

Wheat exports were down both in value and volume in 1989, contributing to a 14% decline in agricultural exports overall. Poor weather in Alberta during 1988 was largely responsible for the decline in wheat exports. Wheat shipments to China and the USSR, two of Alberta's largest markets for wheat, dropped by 78% and 52% respectively, China's concern over its trade deficit was a factor in the reduced imports of Alberta wheat to that country. The USSR experienced a shortage of foreign exchange and this, combined with a good crop in 1989, limited Alberta's wheat exports to the region. Despite a decrease in exports in 1989 to $573 million, wheat remained Alberta's largest agricultural export.

ALBERTA'S TOP 10 AGRICULTURAL EXPORTS **($000s)**

	1988	1989	% Change
Wheat	1,068,111	572,997	-46
Barley	143,602	291,105	103
Canola seed	230,629	253,774	10
Live Cattle	222,442	146,630	-34
Raw hides and skins	101,976	95,830	-6
Beef, fresh, frozen or chilled	56,310	95,801	70
Oats	34,111	87,584	157
Live hogs	53,775	56,563	5
Dehydrated alfalfa	32,726	50,424	54
Oilseed cakes and meal	78,182	49,054	37
TOTAL ABOVE	**2,021,864**	**1,698,762**	**-16**
TOTAL ALL AGRICULTURAL EXPORTS	**2,430,625**	**2,081,117**	**-14**

Forestry

Forest product exports from Alberta continued to expand in 1989. Total exports of wood products were up 17% in 1989 over 1988, with export levels reaching $721 million.

Wood pulp was Alberta's sixth largest export in 1989. Total wood pulp exports were valued at $434 million, an increase of 13% over 1988. The U.S. accounted for 92% of pulp exports.

The number of countries importing Alberta semi-chemical wood pulp increased from four in 1988 to 17 in 1989. Alberta increased production of this pulp from 8 million kilograms air dry (KSD) in 1988 to 101 million KSD during 1989, making this wide export market expansion possible.

Reconstruction in parts of the United States began in the wake of Hurricane Hugo and the San Francisco earthquake, creating a higher demand for a range of construction goods. Exports of lumber increased by 24% in 1989. Lumber accounted for nearly one quarter of forest product exports, exceeding expectations. Panel product exports increased by nearly a third in 1989 over 1988, led by gains in oriented strandboard (OSB) and medium density fibreboard. The two natural disasters in the United States increased the prices for OSB and plywood by up to 25% for a short period of time during 1989.

Joinery and other wood products were down generally, losing 39% of their export value in 1989 from 1988. These commodities, however, comprised less than 1% of Alberta's forest product exports.

ALBERTA'S EXPORTS OF FORESTRY PRODUCTS **($000s)**

	1988	1989	% Change
Wood pulp	385,364	434,472	12.7

Petrochemicals

Worldwide petrochemical prices softened in 1989 as a result of major capacity expansions and slower growth in demand. The value of Alberta petrochemical exports was approximately $1.6 billion, down by about 12%. Alberta was particularly affected by a sharp decline in the price of several ethylene derivatives.

Although polyethylene remained Alberta's major petrochemical export in 1989, exports declined to $378 million compared to $544 million in 1988.

Styrene export volumes showed a marginal gain in 1989, but export revenues were down by 31% to $276 million as a result of lower prices.

Ethylene glycol exports grew by 49% in 1989 to $204 million. South Korea expanded its imports by 100% over 1988 to $76 million; the U.S. increased by 48% over 1988 to $63 million; and Japan increased 39% over 1988 to $33 million.

Methanol was Alberta's fourth largest export, amounting to $182 million in 1989, down 7% from 1988. Despite the overall decrease, Alberta's methanol exports to Japan increased by $11 million, or 15%, in 1989.

Fertilizer exports from Alberta were mixed in 1989. Urea exports were down 8% from 1988, totalling $112 million.

ALBERTA'S TOP 10 PETROCHEMICAL EXPORTS **($000s)**

	1988	1989	% Change
Polyethylene	543,976	378,009	-30.5
Styrene	401,452	276,377	-31.2
Ethylene glycol (ethanediol)	137,404	204,135	48.6
Methanol (methyl alcohol)	195,962	182,493	-6.9
Urea, in packages weighing >10 kg	121,811	112,316	-7.8
Anhydrous ammonia	70,109	73,871	5.4
Vinyl chloride (chloroethylene)	53,981	61,485	13.9
Ethylene-vinyl acetate copolymers	40,921	37,051	-9.5
Saturated acyclic hydrocarbons	9,714	33,508	244.9
Ethylene, propylene, butylene, butadiene, liquified	41,167	26,711	-35.1
TOTAL ABOVE COMMODITIES	**1,616,497**	**1,395,525**	**-14.3**
TOTAL PETROCHEMICALS (BILLIONS)	**1.818**	**1.608**	**-11.6**

Anhydrous ammonia exports remained strong in 1989, increasing 5% over the previous year. The U.S. was Alberta's largest market for fertilizer exports, importing 79% of the province's urea and all of its anhydrous ammonia exports.

Electronics

Electronic products have become an important and growing source of value-added exports for the Alberta economy. Human innovation, a key Alberta strength, is the only limiting factor in electronics production. This is evident in the 64% increase of electronics exports for 1989 over 1988 in what is now a $242 million export industry. Alberta electronics producers exported to more than 90 countries worldwide in 1989, reflecting the global success of this industry. In 1989 approximately 30% of the industry's shipments were exported.

Wired telephone/telegraph sets and their accompanying apparatus was Alberta's number one electronic export. These exports, amounting to over $86 million, were up 135% from 1988.

Total exports of cellular telephone products amounted to $79 million in 1989, an increase of 159%, making this Alberta's second largest category of electronics exports. Within this classification, exports of cellular telephones and their apparatus increased by 529% in 1989 over 1988 with values reaching $35 million. Parts contributed another $44 million, increasing 83% during 1989.

There was a 302% growth of integrated and printed circuit exports in 1989, with values in excess of $13 million. In fact, one quarter of Canada's monolithic integrated circuit exports came from Alberta in 1989. Almost half of Alberta's circuit exports were shipped to Asian markets.

Alberta exports of electronic gas or smoke analysis equipment grew by 135% in 1989 over 1988, with exports valued at $7 million.

Other Alberta electronic exports included automatic data processing machines and parts, which accounted for $18 million of Alberta's electronic exports in 1989. Alberta's competitive technology in electronics distance measuring devices accounted for $5 million in exports in 1989.

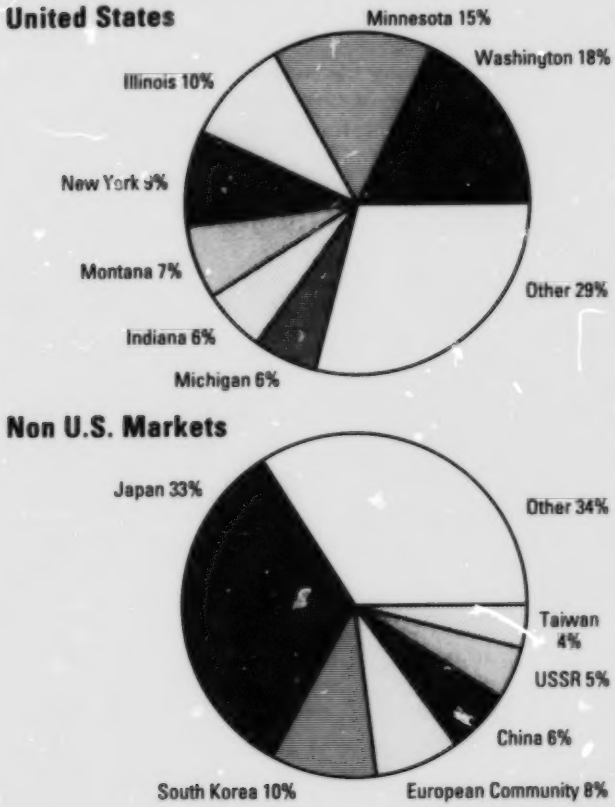
ALBERTA'S EXPORTS OF ELECTRONICS PRODUCTS **($000s)**

	1988	1989	% Change
Wired Telephone/Telegraph sets and apparatus (including parts)	36,817	86,411	135
Cellular telephones and apparatus (including parts)	30,645	79,369	159
Automatic data processing machinery (including parts)	24,663	17,621	-29
Integrated circuits, microassemblies, and printed circuits	3,350	13,466	302
Gas, smoke analysis devices	2,895	6,791	135
Measurement apparatus and other electronic products	49,188	38,352	-22
TOTAL	**147,558**	**242,010**	**64**

ALBERTA EXPORTS BY COUNTRY AND REGION

Alberta continued to broaden its trade links globally. The province exported to 150 countries and territories in 1989, compared to 140 in 1988. Along with the expanding number of export markets, the distribution of exports changed. In 1974 only 5% of the province's exports went to non-U.S. destinations; by 1989, this had increased to 27%.

ALBERTA EXPORT MARKETS, 1989



The results of continued global restructuring were reflected in Alberta's ten largest export markets for 1989.

Exports to the U.S. increased by 5% over 1988. This can be partially attributed to the Canada-U.S. Free Trade Agreement and stronger markets in oil and gas.

The dynamic economies of the Asia/Pacific region stablized after a number of years of impressive growth. Four of Alberta's top ten export markets were from that region.

Japan increased its imports from Alberta by 14% to $1.1 billion in 1989, making Japan Alberta's largest overseas export market.

South Korea moved up two ranks in 1989 over 1988, surpassing China and the combined European Community countries.

ALBERTA'S 10 LARGEST EXPORT MARKETS 1989 ($000s)

	1988	% of Total	1989	% of Total	% Change (88-89)
United States	9,122,384	68.7	9,554,203	73.2	4.7
Japan	1,000,633	7.5	1,140,442	8.7	14.0
South Korea	320,864	2.4	350,502	2.7	9.2
European Com.	330,420	2.5	283,983	2.2	14.1
China	642,406	4.8	220,121	1.7	-65.7
USSR	266,604	2.0	170,227	1.3	-36.1
Taiwan	200,664	1.5	139,368	1.1	-30.5
Saudi Arabia	44,327	0.3	115,794	0.9	161.2
Australia	99,982	0.8	101,500	0.8	1.5
Brazil	92,273	0.7	95,572	0.7	3.6
TOTAL ABOVE	12,120,557	92.6	12,171,712	93.2	0.4
TOTAL ALL COUNTRIES	13,283,514	100.0	13,056,105	100.0	-1.7

China and the USSR experienced major political/economic events setting off ripples of economic uncertainty which impacted on Alberta, decreasing the province's export trade with these two countries.

Saudi Arabia increased its imports from Alberta by 161%, making it the province's eighth largest export market.

Australia and Brazil maintained their market share of Alberta merchandise exports, as they increased their imports of Alberta goods by 2% and 4% respectively.

United States

The United States remained Alberta's largest export market in 1989, importing a wide variety of commodities such as oil and gas, petrochemical products, agricultural products and processed foods, forest products and other manufactured goods. Alberta received $9.6 billion in export revenues from merchandise trade with the U.S. last year. In 1989, Alberta traded with every state in the Union and Washington D.C., a market of over 248 million consumers.

Alberta has enjoyed greater and more secure market access in the United States since the implementation of the Canada-U.S. Free Trade Agreement (FTA) in 1989. The province increased its exports to the United States by 5% in 1989 with 73% of Alberta's total exports destined for that market. In absolute terms, the U.S. increased its imports of Alberta products by $432 million, the most of any country or region in the world.

Oil and natural gas remained Alberta's two largest exports to the U.S. Together they constituted almost $6.2 billion or 65% of the province's total exports to that market.

The United States was Alberta's largest market for petrochemical exports, with $1.0 billion in sales in 1989. Approximately 74% or $280 million worth of Alberta's polyethylene exports, the province's top petrochemical export, was shipped to the U.S. in 1989. Alberta's exports of styrene ($94 million) and methanol ($86 million) were also

sizeable last year. Exports of ethylene glycol to the U.S. totalled $63 million in 1989, an increase of 42% over 1988.

Alberta's exports of agricultural products to the United States reached $609 million in 1989, making it the province's largest market for these goods. This was a marginal increase of 2% over 1988. Oats became Alberta's second largest agricultural export to the U.S., increasing 156% to $81 million in 1989. The deregulation of oats marketing in Canada was partially responsible for this gain. The value of beef exports rose by $16 million to total $65 million in 1989. In terms of volume, beef exports increased by 26% during 1989.

Alberta experienced strong growth in forest product exports to the United States during 1989. Alberta shipped 92% or $398 million of the province's total pulp exports to the U.S. in 1989, an increase of $33 million over 1988. Lumber sales to the United States increased by 21% to $160 million, making it Alberta's seventh largest export to that market in 1989. Alberta's oriented strandboard (OSB) continued to expand in U.S. markets despite a bilateral dispute on plywood which resulted in a delay in the the tariff reduction on OSB under the FTA. In fact, OSB exports to the United States increased by $24 million or 37% as exports reached $89 million in 1989. Increased U.S. demand for Alberta OSB during 1989 was fueled by reconstruction efforts in the United States and labour unrest in the U.S. Pacific Northwest plywood industry.

Alberta strengthened exports of electronic products to the United States during 1989. The U.S. is Alberta's largest buyer of electronics, purchasing $173 million worth in 1989. This was an increase of 82% over 1988. Alberta supplied the U.S. market with various oilfield and communications electronics.

A State-By-State Review

The following Alberta Exports to the U.S. by State table indicates the total value of Alberta exports to each U.S. state in 1989. At this level of detail, exports to some states will be underestimated, while others will be overstated. As U.S. imports of Alberta crude oil and natural gas are primarily credited to the state where the pipeline first crosses the border, Washington state is shown as importing half of Alberta's natural gas exports. In fact, California, not showing as importing natural gas from Alberta, is a major buyer.

Washington state is credited with the largest share, or some 18% of Alberta's total exports to the U.S. Over three quarters, or $1.4 billion, of Alberta's exports to Washington state were from natural gas sales. Live cattle exports from Alberta to Washington in 1989 accounted for 46%, or $64 million, of the province's total live cattle sales. Alberta OSB exports to Washington increased by 32% to $11 million for 1989.

The State of Minnesota was Alberta's second largest importer for 1989, receiving $1.4 billion of Alberta products. This was an 11% increase over the previous year. The export of Alberta's crude petroleum and natural gas, Minnesota's two largest imports from Alberta, declined in relation to a variety of other products. These included oats, which increased by 125% to $41 million, wood pulp with an increase of 3% to $30 million, and polyethylene, increasing 17% to $20 million during 1989.

Illinois imported $931 million worth of Alberta products in 1989, making it Alberta's third largest state market. Twelve of the top 20 exports to Illinois were petrochemicals. Other imports from Alberta included construction machinery, office furniture, and electronic products.

New York imported $873 million, or 9%, of total Alberta exports to the U.S. Natural gas ($441 million), crude oil ($300 million), and wood pulp ($44 million) formed the majority of Alberta exports to New York state.

Alberta expanded its export trade with Montana by 18% to $682 million during 1989. Alberta exported approximately 450 different products to Montana last year, compared to approximately 260 products Alberta shipped to the much larger Minnesota market. It is likely smaller Alberta businesses are taking advantage of opportunities in the immediate export region accounting for the larger number of products exported to Montana.

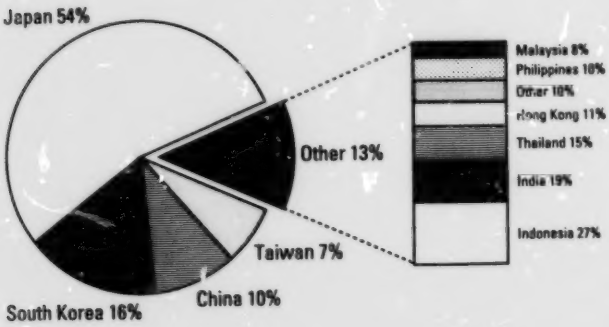
Asia

The 21st century is being hailed by economic observers as the Pacific century. By the year 2000, Asia will have 60% of the world's population, 50% of world production and 40% of world consumption. Asia was Alberta's largest overseas market in 1989, with exports totalling $2.1 billion which accounted for 61% of Alberta's overseas export sales. Alberta strengthened its trade links with Japan, South Korea, Thailand and Malaysia, increasing exports to these countries by 14%, 9%, 11% and 54% respectively over 1988. Asia was the largest overseas market during 1989 for a wide variety of exports from Alberta, including petrochemicals, agricultural products, forest products, and other manufactured goods.

ALBERTA EXPORTS TO ASIA, 1989



Japan remained Alberta's major overseas export market in 1989, with total exports exceeding $1.1 billion, an increase of $140 million over 1988. Alberta's high quality coal remained the province's principal export to Japan as sales increased by 17% over 1988, amounting to $369 million in 1989. Canola seed exports increased slightly to over $220 million in 1989. Methanol exports to Japan totalled $80 million, increasing by 15% in 1989 over the previous year and displacing wheat as Alberta's number three export. Ethylene glycol exports reached $33 million in 1989, posting a 39% increase over 1988.

Alberta continued to be a competitive and reliable supplier of a variety of quality products, contributing to the growth of South Korea's economy. Alberta increased its exports to South Korea by 9% in 1989, with exports reaching $351 million. Coal exports increased by 9% in 1989 to $77 million, becoming Alberta's largest export to South Korea. Ethylene glycol climbed from Alberta's fourth largest export to second place, reaching $76 million; double the 1988 figure. Styrene was South Korea's third largest import from Alberta at $68 million in 1989, down from $84 million in 1988 despite a 47% increase in the volume of styrene shipments. A fall in price of styrene was the result of a soft petrochemical market during 1989.

In 1989, the People's Republic of China implemented new policies in an effort to reduce its trade deficit. First, China devalued its currency by 21% in the third quarter of 1989. Second, China restrained purchases of some industrial inputs and grains. The latter policy affected Alberta as these commodities form most of Alberta's export trade to China. The commodity most affected by this policy was wheat, declining in exports from $434 million in 1988 to $94 million in 1989, a decrease of 78%. Despite China's deficit reduction effort, Alberta increased provincial exports of barley by 114% to $14 million in 1989. Barley was Alberta's third largest commodity export to China in 1989, up from seventh place in 1988. In addition, Alberta continued to develop new markets for other commodities. China purchased several commodities in 1989 which Alberta had not exported to the country in 1988. This list included sulphur totalling $11 million, canola oil at $10 million, and rock crushing machinery parts amounting to $4 million.

Taiwan imported a wide variety of goods during 1989 from Alberta, totalling $139 million. Exports of ethylene dichloride reached $12 million in 1989. Alberta did not export this commodity to Taiwan in 1988. Wood pulp and artificial filament tow (used in cigarette filters) enjoyed similar increases, with export values totalling approximately $2 million for each in 1989. Dehydrated alfalfa increased by 126% in 1989 over 1988, totalling $4 million.

Exports to Indonesia declined marginally in 1989, although the value of sulphur shipments increased by 30% over 1988. In 1989, sulphur contributed $32 million to the $76 million worth of Alberta exports to Indonesia, becoming Alberta's largest commodity export to that country. Wheat and meslin replaced canola oil as Indonesia's second largest import from Alberta, rising 17% to $17 million. Polyethylene exports increased by 21% from 1988 to $10 million, moving up from fourth to third in terms of export levels with Indonesia.

Alberta exports to India amounted to $54 million in 1989, a decrease of 18% over 1988. Sulphur replaced canola oil/mustard oil as Alberta's primary export. Sulphur shipments to India increased by 249% over 1988, making it a $30 million export from Alberta. Exports of potassium chloride increased 26% over 1988 to $10 million, making it Alberta's second largest export to India. Alberta's third largest export to India was polyethylene, which increased more than 16 times from 1988 to total $5 million in 1989.

Alberta exported merchandise valued at $41 million to Thailand in 1989. Styrene was the top export, with shipments totalling $9 million in 1989. Alberta's second largest export was ethylene glycol, with shipments amounting to over $6 million, an increase of 154% over 1988. Rounding off Alberta's top three exports to Thailand was artificial filament tow, which moved up from sixth place in 1988 as exports more than doubled to over $5 million.

Western Europe

Western Europe continued to be an important region in Alberta's export portfolio, with shipments totalling $309 million in 1989. It was the only region where over 40% of Alberta exports were manufactured goods. Gains in Alberta exports were realized in nine of the 18 Western European countries. Exports to Western Europe primarily consisted of agricultural products, petrochemicals, mineral products excluding fuels, forest products, primary metals and other manufactured goods. Exports to the European Community accounted for 92% of Alberta's trade in the region. The European Community's share of Alberta exports to Western Europe decreased by 14% from 1988.

The Netherlands was the largest importer of Alberta merchandise in Western Europe for the third consecutive year, accounting for 26%, or $79 million, of Alberta's exports to the region. Combined with excellent port facilities, several key European commodity brokers are located in the Netherlands. As a result, the country receives much of Alberta's exports which are ultimately distributed throughout the European Community. Vinyl acetate exports to the Netherlands increased by an impressive 87% in 1989 over 1988 with export revenues reaching almost $20 million. Methanol was Alberta's second largest export to the Netherlands, growing by $7 million or 133%, to reach $12 million in 1989.

The United Kingdom was Alberta's second largest export market, with export values reaching $57 million. Wheat was the top export to the U.K., with sales valued at $16 million, followed by cellular phones and parts with exports of $8 million, a 23% increase in 1989 over 1988.

Exports to Belgium expanded in 1989 by $12 million, or 30%, over 1988. Sulphur remained Alberta's top export to Belgium in 1989 with sales up by 29%. Oilseed exports such as canola, mustard and linseed further strengthened Alberta's trade presence in Belgium with an increase of 672%, or approximately $9 million, in 1989.

Eastern Europe

In 1989, Eastern Europe experienced some of the most dramatic political and economic changes of its post-war experience. Imports of Alberta merchandise were up in seven of the nine countries, evidence Albertans are successfully marketing their products to the region. Agricultural products continued to be the primary exports to the region in 1989, accounting for $155 million, or 69% of total export revenues.

Exports from Alberta to the USSR in 1989 totalled $170 million and included a wide variety of goods, many of which had not previously been sold to the Soviet Union. Among the expanded list of Alberta exports was sulphur, the second largest export to the USSR, with sales reaching $39 million in 1989. Other exports included oats totalling $3 million, animal products accounting for $858,000, cattle at $386,000 and assorted manufactured items including oilfield equipment which amounted to approximately $1 million. Alberta's top export to the USSR in 1989 was wheat and meslin valued at $91 million.

Exports to East Germany increased by 62% to $22 million in 1989. Barley was the top export to East Germany amounting to $20 million in 1989, an increase of 93% over 1988 levels. Durum wheat and cobalt, Alberta's second and third largest exports to East Germany, increased by 86% and 228% respectively.

ALBERTA EXPORTS TO EASTERN EUROPE **($000s)**

	1986	1987	1988	1989

Alberta's exports to Poland increased by 39% to $6 million in 1989, largely the result of a $3 million sale of air/gas compressor hoods.

Alberta expanded its trade with Yugoslavia by 56% in 1989, with export amounting to $3 million. The top six exports consisted of products Alberta had not exported to the country in 1988. The largest export to Yugoslavia in 1989 was sulphur valued at $2 million. Other exports included pumps, drilling equipment, and assorted machinery as Alberta developed new markets for commodities in Yugoslavia.

Middle East

Alberta expanded its trade in the Middle East in 1989 to $297 million, a 65% gain over 1988. This region represented the fastest-growing market for Alberta exports. A variety of agricultural products accounted for 86% of Alberta's export revenues in this region.

Saudi Arabia became the top importer of Alberta merchandise in the Middle East in 1989, increasing its imports of Alberta's commodities by 161% to $116 million. Barley, Alberta's top export to Saudi Arabia, increased by 169% over 1988 and accounted for 99% of the 1989 export value. Saudi Arabia recently repealed certain agricultural subsidies, making Alberta barley a competitive alternative to domestically grown barley. Other exports to Saudi Arabia included manufactured goods ranging from prefabricated buildings and telephone apparatus to oilfield instrumentation and pumps.

Exports to Iraq increased by $21 million to $70 million in 1989. Wheat was Alberta's top export, with sales amounting to $48 million in 1989. Barley was the second largest export to Iraq with exports valued at $19 million in 1989; Alberta did not export barley to Iraq in 1988. In fact, 14 of the top 15 Alberta exports to Iraq for 1989 were not sold to Iraq in 1988.

Iran was Alberta's third largest export market in the Middle East, increasing its imports of Alberta merchandise by 81% to $60 million in 1989. Wheat was Alberta's top export to Iran, increasing by 45% to over $40 million. As well, Iran purchased $17 million worth of barley from Alberta in 1989. Twelve of Alberta's top 15 exports to Iran consisted of manufactured products including electronics, oilfield equipment and communication devices.

Alberta expanded its export trade with Israel by 26% to over $25 million in 1989. Sulphur accounted for virtually all exports. Israel also imported small amounts of various petrochemical and medical supplies from Alberta.

Exports of durum wheat, Alberta's largest export to Libya, posted a 24% increase to $4 million in 1989. The remainder of the top 15 exports from Alberta to Libya were manufactured goods, with total export trade reaching $7 million in 1989.

The United Arab Emirates (UAE) increased their imports of Alberta goods by 56% to $5 million in 1989. Alberta exported a wide variety of merchandise to the UAE in 1989, goods not exported to this country in 1988.

Africa

Alberta continued to expand trade links with many African countries in 1989. The province's exports were shipped to 32 of the region's 50 countries, compared to only 22 destinations in 1988. Despite the expansion of markets in Africa, export values to the region declined by 59% to $156 million in 1989. Agricultural products and sulphur continued to be the basis of Alberta's exports to the region during 1989. However, sulphur exports to Morocco and South Africa dropped $138 million and $26 million respectively, decreases which were the primary factors in the overall decrease of $225 million in exports to the region.

* 1987 totals also included exports to Botswana, Lesotho, Swaziland and Namibia.

Exports to South Africa declined by 23% to $40 million in 1989, almost entirely a result of a 51% decline in sulphur exports to that country. Sulphur remained Alberta's largest export to South Africa. The province exported nickel, totalling $11 million, and copper at $4 million to South Africa in 1989, making the commodities the second and third largest exports there. No Alberta exports of these goods to South Africa had been recorded for 1988.

Alberta exports to Morocco declined by 82% in 1989 to $40 million. However, Alberta broadened its trade with Morocco in 11 of Alberta's top 15 exports not exported to the country in 1988. Although sulphur exports declined as the result of a Morocco/India trade dispute, commodities which increased in value during 1989 included canola oil totalling $690,000, and other manufactured products amounting to $139,000 of which telephone apparatus comprised $89,000.

Oceania

Alberta continued to expand its trade in the South Pacific as exports grew by 5% to total $124 million in 1989. Major exports to Oceania included sulphur, petrochemicals and other manufactured goods.

Total exports from Alberta to Australia increased by over $1 million to nearly $102 million in 1989. Although sulphur and polyethylene decreased their share of total exports to Australia from almost three quarters in 1988 to two thirds in 1989, they remained Alberta's two major exports to Australia. Other exports included urea totalling $10 million, animal products amounting to $4 million and artificial filament tow at $2 million. Exports of these goods increased by 51%, 115%, and 179% respectively.

Alberta exports to New Zealand increased by 29%, with exports totalling $22 million in 1989. Sulphur and polyethylene were the largest exports from Alberta to New Zealand during 1989, with Alberta sulphur exports to New Zealand almost doubling over 1988.

ALBERTA EXPORTS TO OCEANIA **($000s)**

	1986	*1987*	*1988*	*1989*
Australia	81,216	85,551	99,982	101,500
New Zealand	10,597	18,621	16,770	21,559
Papua New Guinea	453	208	554	712

TOTAL	**92,338**	**104,417**	**117,618**	**123,930**

Alberta strengthened its export trade with Papua New Guinea by 29% in 1989. Exports included such diverse goods as drilling and construction machinery, cellular telephone apparatus, and polyethylene. With the exception of one manufactured product, these were products Alberta had not exported to Papua New Guinea in 1988.

South America

Alberta exported $150 million of merchandise to South America during 1989, down 10% from 1988. Alberta exports to this region included sulphur, agricultural products, coal,

and other manufactured goods. Alberta expanded its exports to the three largest markets in South America in 1989 - Brazil, Chile and Colombia.

Brazil purchased 64% of all Alberta exports to the region, as exports to Brazil increased by 4% to $96 million in 1989. Major exports to the region included sulphur totalling $51 million, coal at $28 million, and wheat amounting to $12 million.

Chile became Alberta's second largest export market, rising from fourth place in 1988. Overall, exports to Chile from Alberta increased by 38% during 1989. In particular, Chile increased its imports of electronic products from Alberta by 214%. These products, mainly cellular telephone apparatus, accounted for 25% of the province's exports to that country.

Alberta's export trade with Colombia increased marginally to $18 million in 1989. Only three of the top 15 Alberta exports to Colombia were exported to this country in 1988. Among the "new" exports were dried beans, oilfield instruments and machinery, and electronic products.

ALBERTA EXPORTS TO SOUTH AMERICA ($000s)

Central America, Mexico and the Caribbean

Alberta continued to expand trade relations with Central America, Mexico and the Caribbean in 1989, exporting to 29 of the 32 countries in this region compared to only 18 countries in 1987. However, the value of Alberta exports to the region declined by 19% to $125 million in 1989. Almost half the exports were agricultural products, with the remainder comprised of sulphur, petrochemicals, and other manufactured goods.

Exports to Mexico decreased by 6% to $72 million in 1989. Alberta sulphur exports decreased in terms of total export share from 49% in 1988, or $37 million, to 42% in 1989, or $30 million. However, Alberta canola seed exports to Mexico increased by 10% to $24 million, and dried bean exports posted a 100% gain to total $3 million in 1989. Wood pulp exports from Alberta, of which there were no exports in 1988, totalled $2 million in 1989.

Cuba began restructuring its trade patterns in 1989. This disrupted trade with almost all Cuba's trade partners, including Alberta. Fluctuations in Cuba's trade included an increase in Alberta sulphur exports, which were up by 88% to $4 million in 1989, and a 39% drop in wheat exports, from $35 million in 1988 to $22 million in 1989. Despite these fluctuations, wheat remained Alberta's largest export to Cuba, with sulphur in second place.

Exports to Jamaica increased by $11 million, or 305%, in 1989. Alberta's top three exports, ammonium sulphate, wheat and urea, increased by 390%, 556% and 524% respectively. Alberta also exported polyethylene to Jamaica for the first time in over five years.

Exports to Honduras expanded to $2.6 million in 1989 from $56,000 in 1988. The two largest exports from Alberta were urea and wheat.

Exports to Belize increased from $31,000 in 1988 to over $1 million in 1989. The major commodity exported to Belize was sulphur. It was Alberta's fifth largest market in the region in 1989, compared to 20th place the previous year.

Take Your Place Among The Stars

Every year Alberta journeys to the stars
And keeps both feet on the ground

Because once a year the Alberta Export Awards pay tribute to the companies who have achieved international distinction in exporting. These are the companies who reached for the sky and brought us the stars. They shed an individual light on Alberta exports around the globe. They have brought their success back down to earth. And back into Alberta's economic strength and diversity.

You too can add your company's name to the export stars of Alberta. Alberta Economic Development and Trade can assist your company in tapping the potential of foreign markets through the Let's Talk Trade program. A variety of further programs and seminars are also available. It's a long way up, but we're here to help. For more information on exporting to the international marketplace
